Greek – B1

## Hobbies

Sports

Coding

## Career Objective

Ambitious and self-driven **junior software engineer** with a strong foundation in **Core Web Technologies, React.js, Next.js, Tailwind CSS, and TypeScript**. Experienced in building responsive and scalable web applications with clean, reusable code and modern UI design principles. Seeking to contribute to a dynamic development team, grow into a **full-stack software engineer**, and create impactful digital solutions through innovative software development.

## Experience

### LeonArchitectGroup – Web Assistant (Intern)

*July 2025 – December 2025 | Athens, Greece*

Maintained and updated multiple client and internal websites using WordPress and Elementor, ensuring layout consistency, responsive behavior, and content accuracy.

Contributed to the [Athens House of Myths](#) website by implementing internal linking, creating individual room pages from a master layout, and improving navigation and overall structure.

Supported the development and deployment of business websites, including [Mitrikiagkalia](#) and internal [LeonArchitectGroup](#) web properties, focusing on usability, content presentation, and brand alignment.

Participated in early-stage website development for a health-related business project, working on page structure, responsive layouts, and front-end presentation prior to final launch.

Assisted with website publishing and deployment workflows using hosting platforms such as **Hostinger** and **Netlify**.

## Projects

### Product Landing Page – Clothing Brand - Creator

Designed and developed a responsive landing page for a clothing brand using NextJS, React, Tailwind CSS, TypeScript and Vercel.

Implemented a modern and user-friendly UI to showcase products effectively

Optimized the page for performance and mobile responsiveness

### Daily Tracker – Creator

Built a responsive web app to track daily tasks and habits.

Implemented task creation, progress monitoring, and state management.

Designed a clean UI with reusable components for scalability and maintainability.
